Magnificent Architecture, passion for quality plus work, eye for layout detailing and thorough professional approach is what separates choice-india from the rest. All in all an outstanding project by an outstanding developer choice-india.

The planning and provision of services and infrastructure is quite impressive. Choice concentrates as much outside the complex as much as within the complex. We are thrilled to have chosen choice-india over others on investing in buying the property for our zonal office and earning well deserved peace of mind. Truly exceptional. We have been consistently recommending choice-india to our well wishers and associates.

choice-india under the leadership of the CMD Mr Shashidhar Reddy is a very straight forward company with firm core values and a professional team and approach. They let their work speak on their behalf. Routine extra pleasing of the prospective customers is surprisingly missing here. But their superior quality of the work makes them walk tall. Society in particular and the country at large will benefit by the presence and growth of such companies whom we all should constantly support.

The process of registration of the sale deed has been very surprisingly a pleasant experience. The coordination between the sales team and the registration team has been very good. We did not feel any strain which is the norm in most cases, when we went to the registration office. Special thanks to V. Srinivas and I. Sudhakar for making our experience a very pleasant and memorable one
